
PROFESSIONAL SUMMARY

Data-driven professional with 2+ years of operational experience in e-commerce, working with large operational datasets across catalog, inventory, and reporting workflows. A self-starter who independently validates skills through hands-on analytical projects — proficient in Excel, SQL, Python, and Tableau. Experienced in data extraction, transformation, and visualization — with a strong focus on translating complex datasets into clear, actionable insights for stakeholders.

SKILLS

- **Spreadsheet:** Microsoft Excel (Pivot Tables, Lookup Functions, INDEX-MATCH)
- **Data Querying:** SQL (Joins, CTEs, Window Functions, Subqueries)
- **Database Systems:** MySQL
- **Programming & Analysis:** Python (Pandas, NumPy, Scikit-learn), Exploratory Data Analysis (EDA), Data Cleaning
- **Data Visualization:** Tableau (Dashboard Development), Power BI (Dashboard Development)
- **Tools & Environment:** Jupyter Notebook, GitHub (Repository Management)

PROJECTS

Brazilian E-Commerce Strategic Market Analysis | SQL, Python, Tableau - [GitHub](#)

- Analyzed 100K+ orders by integrating 8+ relational tables using SQL and Python to investigate the relationship between freight costs and delivery efficiency.
- Applied Scikit-learn regression models to forecast delivery lead times and identify key variables impacting order fulfillment speed across regions.
- Uncovered a 45% delivery time gap between North/Northeast and Southern regions despite comparable freight costs, confirming infrastructure as the primary bottleneck over pricing.
- Identified a High-Friction Zone in the North where freight cost and delivery time showed weak correlation ($r < 0.3$), revealing that "Express" shipping premiums rarely translated to faster delivery, recommending a decentralized warehouse strategy to reduce lead times.
- Designed Tableau Storyboard with a What-If simulator, enabling stakeholders to benchmark carrier performance against regional averages and support logistics planning.

Real Estate Price Analysis & Prediction | SQL, Python, Power BI - [GitHub](#)

- Analyzed 1,460+ residential properties by integrating structured property data using SQL and Python to investigate the relationship between property features and market valuation across 25 neighbourhoods.
 - Applied Scikit-learn regression models to predict residential property sale prices, evaluating model performance through MAE, RMSE, and R^2 metrics to identify the most accurate valuation approach.
 - Uncovered significant price disparity across neighbourhoods and property segments, identifying clear premium, value, and undervalued opportunity categories to support investment advisory decisions.
 - Quantified the impact of key property features on sale price through statistical analysis, surfacing actionable renovation and acquisition insights.
 - Built an interactive Power BI dashboard to visualize property valuations, neighbourhood price trends, and acquisition opportunities — enabling stakeholders to explore valuation insights.
-

PORTFOLIO

- **GitHub:** <https://github.com/Nitinanalyst-25> (SQL, Python Projects)
 - **Tableau Public:** <https://public.tableau.com/app/profile/nitin.dhiman8857> (Dashboards)

CERTIFICATION

Microsoft Azure Data Analytics Certification– Simplilearn

WORK EXPERIENCE

Catalogue Management Executive – Techjockey Infotech Private Limited

Sep 2023-Present

- Independently applied SQL to audit product data for discrepancies, null values, and mapping errors — going beyond standard workflows to ensure backend-to-portal consistency across 4,000+ listings.
 - Built and maintained consolidated Master Information Sheets by integrating SEO data, technical specifications, and vendor details using Advanced Excel (VLOOKUP/XLOOKUP); produced reports to track catalogue growth and performance trends across successive periods.
 - Performed market and search trend analysis using Google Trends and Keyword Planner, analysing location-wise search volumes to prioritise catalog expansion decisions based on demand signals and growth potential.
 - Maintained data accuracy and consistency across large-scale product datasets through structured validation checklists and periodic audits, upholding data quality standards across catalogue operations.
 - Collaborated with SEO, vendor, and sales teams to align product data with business objectives, resolve data discrepancies, and coordinate new product onboarding.
-

EDUCATION

- **B.Sc(H) Electronic Science**, Rajdhani College, University of Delhi 2016-2019
 - **Standard 12th**, Central Board of Secondary Education 2016
 - **Standard 10th**, Central Board of Secondary Education 2014
-
